

PLANTER BOX TREATMENT

BioBoost™ is a one-step planter box treatment that delivers a complete nutritional start. BioBoost is packed with essential micronutrients that nearly 80% of fields are missing, while also evenly coating each seed with biology, amino acids, and endophytic fungi, keeping the ingredients right where they belong, on the seed.

5 WAYS BIOBOOST CORN POWERS UP YOUR SEED

1. **Fixes hidden micronutrient deficiencies** by releasing tied-up Zn, Mn, Fe, and B for better plant-available nutrition.
2. **Drives even emergence**, more uniform stands and faster canopy.
3. **Builds bigger roots and thicker stalks** to mine deeper for moisture and minerals all season.
4. **Improves stress resilience** by maintaining chlorophyll levels, enzyme balance, and photosynthesis under heat, drought, or saturation.
5. **Delivers measurable ROI** with yield gains and higher micronutrient efficiency, protecting your fertilizer investment.

KEY INGREDIENTS

- **Dust™**: smooth application and even coverage
- **Macro + Micronutrient**: essential fuel for early vigor
- **Endophytic Fungi** (*Beauveria bassiana*): powerful partners inside the plant
- **Amino Acids**: accelerate metabolism and root strength
- **Superior Food Source**: feeds biology, drives performance all season

APPLYING BIOBOOST CORN

- **Rate**: 0.75 oz per unit of corn seed (80,000 seeds/unit).
- **Timing**: Apply to the seed **at planting** as a seed lubricant.
- **Placement**: Planter box / hopper treatment that replaces talc & graphite, no in-furrow system required.
- **Compatibility**: Safe with treated seed and common seed treatments.

HOW IT WORKS

BioBoost Corn replaces talc and graphite in the planter box, coating each seed with biology, amino acids, and micronutrients. After planting, the microbes get to work, solubilizing and making Zn, Mn, Fe and B plant available. The result is faster emergence, bigger roots, stronger stress resilience and season-long nutrient uptake that shows up in the tissue tests and yield.

**UP TO 42%
MICRONUTRIENT
EFFICIENCY**

**3X RETURN
ON INVESTMENT**

STEP 1

Add to
planter box
or pro box.

STEP 2

From germination to emergence, BioBoost™ Corn energizes your seed and soil so your plant is setup for enhanced nutrient uptake.

STEP 3

Season-long performance is proven by wider stem diameter and bigger roots.
