

Empower Growth with BW BioBoost™ Corn: Enhance Plant Resilience, Unlock Genetic Potential, and Thrive Against Season-Long Stressors.

Introducing BW BioBoost™ Corn: the revolutionary planter box treatment system engineered for unparalleled seed performance. Harnessing the power of soy protein-derived dust, our cutting-edge formula unlocks the genetic potential of every seed while minimizing equipment wear and tear.

Our 100% renewable dust formulation guarantees safety for all users, setting a new standard in sustainable agriculture. Built on the foundation of the Environoc® Seed Treatment microbial team, BW BioBoost™ Corn delivers results from day one, enhancing emergence and fortifying plants with essential nutrients, including amino acids.

Say goodbye to planting stress with BW BioBoost™ Corn. Our pioneering solution boosts active carbon levels, ignites early plant vigor, and optimizes water efficiency, culminating in maximum performance and yield.

Experience the difference with BW BioBoost™ Corn's exclusive nutrient blend, engineered to fortify cell walls, reduce stress, and supercharge photosynthesis. Revolutionize your planting environment and unlock peak responses early in the plant's lifecycle. With BW BioBoost Corn, the future of agriculture starts now.

FEATURES & BENEFITS:

Environmentally Safe Ingredients

Carcinogen and insecticide-free solution that minimizes health risks for farmers and the environment. PFR proven and a direct replacement for Graphite and Talc.

Powered by Environoc®

BioBoost™ with Environoc® Enhance emergence, promote early association, and boost yield.

The All-in-One Solution!

The ultimate solution for maximizing nutrient transfer, boosting active carbon, improving water efficiency, enhancing photosynthesis, and minimizing stress.

RATE: 0.5 oz./unit of seed (unit of Corn = 80K kernels)

TIMING: Apply to seed at time of planting as a seed lubricant. **(DO NOT add Graphite or Talc)**

APPLICATION: For Bulk Fill Planters: spread one container of BioBoost™ on the seed in the top of the pro box prior to transfer into the planter or seed tender.
For Individual seed box per row planters: add unit of seed to box, spread 0.5 oz. BioBoost™ on top of seed and stir seed until BioBoost™ is evenly applied to seed.
